

## Marine Bio trophic level project

You will create a Prezi that shows the trophic levels of a marine environment.

You must include at least

- 8 different levels

- labeling producers, consumers, Carnivores, herbivores, autotrophs or heterotrophs

- Show how energy is transferred through the system and how much

- Include common names and scientific names of each organism

- A picture must be included for each organism

- Humans **cannot** be a part of the cycle
