

Create a trifold brochure on a new study or research project on any Fish.

Choose Bony fish, Sharks, Skates or Rays, or Agnathids

Find three medical, technological or entrepreneurial uses for one of these species and create a brochure advertising it.

Cultures have been using Manta Gill rakers as a way to make a profit for their community by selling the rakers to China. <http://www.mantarayofhope.com/>

Create your own brochure campaign to protect these animals.

List why they need to be protected

What is their role in the ecosystem

Why are they important

What are negatives or positives to limiting the fishery

how do we mitigate the impact of cultures

how do we advertise for the protection of the organisms

Create your own campaign slogan and logo.

Racing extinction

OR create a brochure advertising why sharks and skates need to be researched and protected for **medical or health** reasons

<http://www.dailymail.co.uk/health/article-2039323/An-antibiotic-liver-sharks-revolutionise-human-medicine.html>

List why they need to be protected

What is their role in the ecosystem

Why are they important

What are negatives or positives to limiting the fishery

how do we mitigate the impact of cultures

how do we advertise for the protection of the organisms

Create your own campaign slogan and logo.

How we can create a responsible fishery for certain species:

Hagfish slime

<https://www.youtube.com/watch?v=pmaal7Hf0WA>

-Include the name of the species you chose.

-Why they need to be protected

-How to protect them and offer a responsible fishery so humans do not deplete resources

-Use at least 4 resources and cite them in APA format

-how are you going to advertise for this fishery.

-who do you need to talk to about changing fishery regulations
